

Cat Cans is locally owned by Matt and Aricca Wallace. We have been providing customers our personal and dependable pumping services in Manhattan and Surrounding Areas since September 2010.

**We are now offering the service of
GREASE TRAP PUMPING**

In virtually every commercial kitchen, a grease trap or a grease interceptor is installed and needs to be maintained regularly. The Fats, Oils and Grease (FOG) are considered a hazardous substance and need to be cleaned up and disposed of properly. Failure to maintain this system can result in clogged plumbing lines and unsanitary back up in your kitchen!

Cat Cans also offers **Pro-Pump DGTT**; a liquid bacteria additive, which will help keep drain lines and grease traps free-flowing and odor free.

WE WILL SET YOU UP ON A REGULAR MAINTENANCE SCHEDULE
